

# PRIMO® XXM

Standard Seat with  
Mechanical Suspension

  
**GRAMMER**

# TECHNICAL DATA PRIMO® XXM

The Primo XXM has an easy-to-use lever for optimally setting the suspension to the driver's weight within the range between 45 and 170 kg. Especially when a vehicle is used by multiple drivers, it's important for unpracticed users to be able to quickly and intuitively perform this important setting. The extra-high backrest, in conjunction with a lumbar support, bolsters the back and ensures an even more comfortable ride.
